

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Original) A plastic lens produced by injection molding of resin material, comprising:
  - a flange part on a periphery of a lens surface, a flange surface on at least one side of the flange part having a part higher than the lens surface and a depressed part formed on at least a part thereof; and
  - a marking integrally molded by injection molding to a marking surface of the depressed part, a highest point of the marking being lower than a highest point of the flange surface.
2. (Original) A plastic lens according to Claim 1, wherein the flange part has a cutout portion in an outer side surface thereof.
3. (Original) A plastic lens according to Claim 1, wherein the flange surface is mirror-finished at least in a vicinity of an area where the marking is formed.
4. (Original) A plastic lens produced by injection molding of resin material, comprising:
  - a flange part on a periphery of a lens surface, a flange surface on at least one side of the flange part having a part higher than the lens surface; and
  - a marking integrally molded to the flange surface by injection molding, for identifying a production jig used to produce the lens.

5. (Original) A plastic lens according to Claim 4, wherein a highest point of the marking is lower than a highest point of the flange surface.
6. (Original) A plastic lens according to Claim 4, wherein the marking is formed in a depressed part of the flange surface.
7. (Original) A plastic lens according to Claim 4, wherein the flange part has a cutout portion in an outer side surface thereof.
8. (Original) A plastic lens according to Claim 4, wherein the flange surface is mirror-finished at least in a vicinity of an area where the marking is formed.
9. (Original) An optical pickup device having the lens according to Claim 1.
10. (Original) An optical pickup device having the lens according to Claim 4.

11-21. (Canceled)
